

Remote Services Market Report Q2 2020

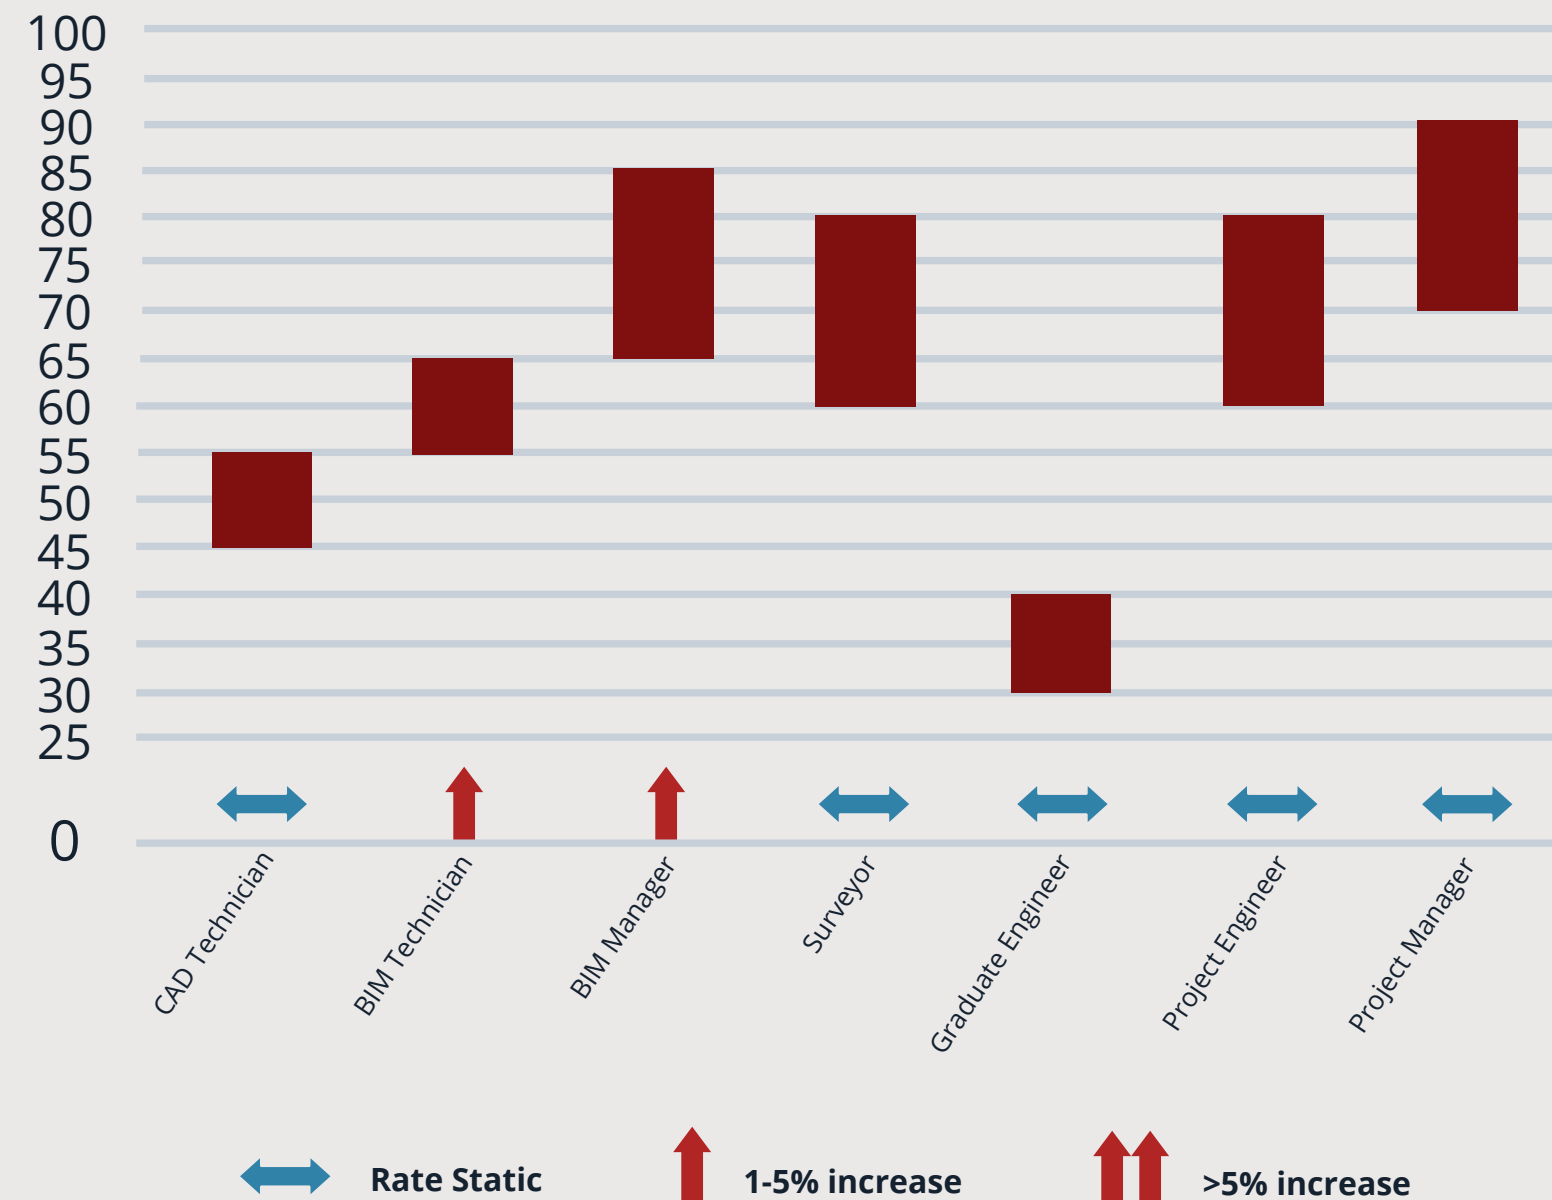

Multinationals in certain sectors and locations are finding it increasingly difficult to recruit for certain roles on an onsite basis. Other multinational clients are encountering space constraints. The market demanded an off-site solution. In 2017 Headcount invested significantly and developed its off-site managed service.

With the onset of COVID-19, on-site teams may no longer be possible and remote working solutions are to be encourage for all that can do so. Headcount has pioneered remote working and has provided successful off-site and remote working solutions to several multinationals clients. Our remote BIM teams have recently seen significantly increased demand.

Covid-19 Roadmap

- 1** 18th May, phased return of outdoor workers. Remote working continues for all that can do so.
- 2** 8th June, limited return to onsite working subject to compliance capability. Remote working continues for all that can do so.
- 3** 29th June, return to low-interaction work. Remote working continues for all that can do so.
- 4** 20th July, return to work where employees cannot remote work. Remote working continues for all that can do so.
- 5** 10 th August, phased return to work across all sectors. Remote working continues for all that can do so.
